User stories - Am I doing this right?

User Story:

As a person who has trouble of keeping track of time, **I want a** running timer that will time my Pomodoro Session and alert me when the session is over **so that** I know when to stop and do something else.

Acceptance Criteria:
- A start button that will start counting down the time
- A running timer that counts down
- A sound/alarm that will alert use when time is up

User Story:

As a person living with many distractions, **I want** a running timer that will allow me to reset or end Pomodoro sessions **so that** I can start trying to focus from the very beginning or end the session to deal with whatever distraction I have.

Acceptance Criteria:
- A reset button that allows the user to restart the Pomodoro session
- An end button that allows the user to completely end the Pomodoro session

User Story:

As a pianist, **I want** to be able to practice playing my repertoire of music **so that** I can play them at my upcoming recital.

Acceptance Criteria:
- A timer that will allow them to focus on practicing while also giving the pianist the break they need.

User Story:

As a person who likes doing things manually, **I want** to start Pomodoro sessions and short/long breaks manually **so that** I that I can experience the gratification of clicking buttons.

Acceptance Criteria:
- Manual buttons for Pomodoro Session and Short/Long breaks

User Story:

As a student cramming for an exam, **I want a** running timer that will automatically run an entire Pomodoro Session and alert me when the segments are up **so that** I can focus on what I'm doing without having to keep dealing with the timer.

Acceptance Criteria:
- An automatically running timer that moves on to the next segment of a full Pomodoro Session
- Each time the timer reachers 0, the timer shout set off a ringtone to alert the user to move on to the next segment

User Story:

As a busy student with mulitple classes, **I want** a way to keep track of the tasks I am working on as well as setting deadlines for them **so that** I can hold myself responsible for completing the tasks.

Acceptance Criteria:
- A task list where the user can write tasks they plan to accomplish
- A parameter for each task that represents the amount of sessions dedicated to a certain task
- A checkmark feature to display which tasks I have completed.

User Story: (this is a review for actual timer)

As a person works on different sorts of project, **I want** to have more flexibility on the intervals scheduled for each task.

Acceptance Criteria:
- you could customize focus/break times for individual projects
- you could time sub-tasks more directly.

User Story:

As a gym enthusiast, **I want** to be able to have an option to change the length of sessions **so that** I can adapt it for each different workout routine.

Acceptance Criteria:
- Manual buttons for Pomodoro Session and Short/Long Breaks
- Loud notification ring to alert user to move on to start/end session move on to break

User Story:

As a office worker with a needy pet working from home, **I want** a period of time to work and a short period of time to give my pet the attention it needs **so that** I can get my work done without neglecting my pet.

Acceptance Criteria:
- A timer that sections off time into different sessions where office worker focuses on work for a session and then focus on their pet during another session
- Pomodoro Session for work and Break sessions for playing with pet.

User Story: (this is a review for actual timer)

As a office worker in a quiet workspace, I **want to** be able to control the sound feature quickly.

Acceptance Criteria:
- provide a short-cut to turn sound on/off quickly.

User Story:
As a project manager in work place, **I want** to use a timer with a task list where instead of requesting times to set up meetings, fellow colleagues can request how many sessions they need **so that** I can be promoting the most effective and successful work environment.

Acceptance Criteria:
- A task list where you can schedule tasks and it will let you know what time you will finish all the tasks.
- A way to see if I can finish all my pomodoro sessions in a given time frame.

User Story:

As a remote office worker in a virtual environment, **I want** my pomodoro timer to save my progress in case I accidentally close the tab **so that** I can continue where I left off.

Acceptance Criteria:
- Pomodoro Timer needs to save tasks on tab close
- Prompt user if they wish to close tab (remove error-prone situation)

User Story:
As a DJ whose boss had told to play music and advertisements after certain intervals that are different each day, **I want** a timer that alerts me after those differing intervals are over **so that** I know when to switch what I play.

Acceptance Criteria:
- A feature that allows for the length of time of each session to be adjusted

User Story:

As a computer science major where I tend to have multiple windows open at once, **I want** to use a timer that will alert me at start/end sessions even if my current screen is not the webpage **so that** I can be working as effective as I can.

Acceptance Criteria:
- A way to have the sound indicating a start/end session be present even if my web browser is minimized.
- Be able to have the timer in a small screen where I can view the timer but it takes up minimal screen space.

User Story:

As a construction worker, **I want** a timer where I can adjust the volume **so that** I hear the alerts when I'm working in loud place and not disturb anyone when I'm in quieter areas.

Acceptance Criteria:
- A feature that allows for the volume of the timer to be adjusted,

User Story: (this is a review for actual timer)

As a grad student, I have a very intense schedule everyday. I **want to** my to-do list to be sorted.

Acceptance Criteria:
- provide a to-do list that is sorted by time, not date

User Story: (this is a review for actual timer)

As a data-driven person, I **want to** export my daily focus-session out as files and analyze them using Python, and show them on my personal website.

Acceptance Criteria:
- provide export to csv/excel feature.

Two things would make this 6-stars
Amazing app, simple to use, beautiful to look at, feature-rich, one-time pricing - It's the best Pomodoro (and might I argue, todo list app) out there. There's a few things that would make this even better
1. Keyboard shortcut to turn on/off the ambient sound. There are times when I am working on a project and focusing, but need to watch a related video or talk. I want to be able to quickly turn on/off the sound.
2. Connection with ToDoist - that's the app I use for managing my task list. Being able to sync with that app would make it a lot easier to track time.
3. Ability to create sub-projects and sub-tasks (and perhaps start and end dates for tasks) would make this a more full-featured ToDo Pomodoro app.
Looking forward to the upcoming versions and features. Thank you!

Excellent combination of task-management and focus timing!
I was very pleased to find an app in which I could combine my to-do list with a focus timer. After having used it for a month or two, and even upgrading to the paid version (a one-time fee that's well worth it), I'm very satisfied with what it can do.
I gave it four stars only because I'm being very picky; it would be better if (1) you could start the next pomodoro or break right from the desktop notification, (2) dark mode were a thing, (3) you could customize focus/break times for individual projects, and (4) you could time sub-tasks more directly.
Still, a GREAT app overall! Would recommend.

great app, two requests
great app, well designed and thoughtout.
I do have two requests that I think can further benefit users.
1. theme feature to match the one in the phone app.
2. ability to customize timer length for each project. E.g. when i use it for workout, I would wish the length is 10 minutes rather than 30 minutes, which I use for working.

just missing one thing
amazing app that keeps me going for my gradschool work. I can manage all my study times and other extra hours .Just missing one feature. It doesn't list todo list by time. it does by date. but not by time. I may have missed how to do it tho.

Need to be able to data in csv
Please make it available for us to download our log in csv files. It's a very common feature but I am surprised not to see that option from the user interface. The mediocre rating will be updated once this feature is brought.

Needs Better Reporting by Day and By Project
The app works each day.
The app's value is in providing a summary of HOW one uses one's time.
The app needs a way to chart time each day on each project and task.
